
Session 22: Graphic Design 3: Brand Identity & Infographics

Presented by

Ravindu Sooriyaarachchi

Canva

The "Make it Look Good" Request

- In a real office, bosses rarely ask you to "design a poster from scratch."
- Instead, they hand you a boring 3-page Word document full of text and numbers and say: "Can you make this look good for the client presentation?"
- **Your Secret Weapon:** The Infographic.

Visualizing Information (Infographic)

- An infographic is a visual representation of information, data, or knowledge.
- It replaces heavy paragraphs with charts, icons, and short text bites.
- **The Goal:** A client or customer should be able to scan the page in 10 seconds and understand the main message.

Controlling the Viewer's Eye

- **The Z-Pattern:** In Western cultures, people read screens in the shape of a "Z" (Left to right, down on a diagonal, then left to right again).
- **How to use it:** Put your most important information (like the Logo or Title) in the top left. Put your "Call to Action" (like the Website link) in the bottom right where their eye finishes scanning.
- **Size Matters:** Your eye automatically goes to the biggest item on the page first. Make sure your title is the largest text!

The "Brand Kit" (Less is More)

- Amateurs use 10 colors and 5 fonts because they can. Professionals use strict limits.
- **The Rule of 3 Colors:** Choose ONE primary color, ONE secondary color, and ONE accent color. Stick to them!
- **The Rule of 2 Fonts:** Choose ONE bold font for your headers, and ONE clean font for your paragraphs. Never mix more than two.

Colors Speak Louder Than Words

- **Blue:** Trust, Security, Technology, Corporate.
(Perfect for IT and official reports).
- **Red:** Excitement, Urgency, Hunger, Danger.
- **Green:** Growth, Health, Money, Eco-friendly.
- *Rule of Thumb:* If you are designing a professional IT report, avoid neon pink and yellow!

TRANQUILITY AUTHORITY WISDOM STABILITY CLEANLINESS FRESHNESS FREEDOM COLD SADNESS DEPRESSION	LOVE EXCITEMENT WARMTH ROMANCE PASSION SPEED LUCK RAGE BLOOD AGGRESSION	HEALTH HAPPINESS FRIENDLINESS ENTHUSIASM ENERGETIC YOUTH FUN RUIN DANGER DESOLATION	CREATIVITY FRIENDLINESS CHEERFULNESS ENERGETIC OPTIMISM WARMTH JOY ILLNESS DANGER MADNESS	NATURE GROWTH PROSPERITY HEALTH HOPE LUCK LIFE ENVY POISON CORRUPTION

Serif vs. Sans Serif

- **Serif Fonts (e.g., Times New Roman):** Have little "feet" at the ends of the letters. They look traditional, formal, and academic
- **Sans Serif Fonts (e.g., Arial, Open Sans):** Do *not* have feet. They look modern, clean, and tech-friendly.
- **Corporate Rule:** For modern web design and IT infographics, almost always use Sans Serif fonts! They are much easier to read on computer and phone screens.

Not All Charts Are Equal

- **Pie Charts:** Use ONLY when showing parts of a whole (e.g., "60% of students use Android, 40% use iPhone"). Never use a pie chart if the numbers don't add up to 100%.
- **Bar Charts:** Use for comparing different items (e.g., "Sales in 2024 vs. 2025 vs. 2026").
- **Progress Rings:** Perfect for highlighting a single, impressive percentage (e.g., "95% Graduation Rate").

 Graphs and Charts			
What it Looks Like	What it is	When to Use it	What to Remember
	Scatter Plot	Reporting Relationships/Correlations Between Different Variables	When Using More than 10 DataPoints, Place in a Horizontal Axis.
	Column Chart	Showing Change Over Time Between Two Variables with the Same Unit of Measurement and Comparable Sizes and is Oriented Vertically.	Use When You Want to Show Minimum and Maximum Values.
	Bar Chart	Comparing Data Across Different Categories and is Oriented Horizontally.	Place Your Values on the x-axis, Categories on the y-axis, Use When the Number of Categories is Between 5 and 8.
	Line Chart	Showing Data Trends Over Time but Have too Big Dataset for a Column or Bar.	Great When the Number of Categories is 8+ and Works Well in Combination With Bar Charts.
	Combination Chart	Comparing Two Variables With Different units of Measurement or Sizes.	Great to Use When you Want to Measure Values that are Significantly Different in Range.
	Pie Chart	Showing Relative Proportions (or Even Percentages).	The Data Set Must Represent Part of a Whole, and Data Should be on Comparable Sizes so Nothing is Dwarfed.
	Stacked Column	Showing the Composition of 5-8 Categories.	This Follows the Same Rules of a Pie Graph, But With More Categories.
	Stacked Area	Emphasizing the Magnitude of Change Over Time With Fewer than 8 Data Points.	Use this to Show the Trend of Compositions.
	Histogram	Showing the Distribution of Data.	Use this When you Want to Show the Distribution of Data Across Groups.
	Venn Diagram	Showing Overlapping Data Sets.	Consider this for Attribution Modeling No Overlap = No Attribution Problems.

Stop Using Bullet Points!

- **Lists:** Instead of standard black bullet points, use colorful icons (like a checkmark or a star).
- **Concepts:** If you are talking about "Global Reach," don't just type it out—insert an icon of a globe next to the text.
- *Zoom Demo:* Watch my screen as I show you where the "Elements" and "Charts" tabs are hiding in Canva.

Good Design vs. Bad Design

Live Guided Activity: The SITC Infographic

- **The Mission:** Transform this boring text into a professional A4 poster.
- **The Rules:** Open Canva side-by-side with Zoom. Do not work ahead! We will build this together, step-by-step.
- Title: Fast-Track Your IT Career
- Course: Free Basic ICT Course
- Stat 1: 100% Free Tuition for SITC Students
- Stat 2: 24 Total Practical Sessions
- Core Skills: Microsoft Office, Canva Design, Cloud Computing, AI Tools
- Website: free-ict.sitc.lk

How to Save Your Infographic

- **For the Office Printer:** Download as **PDF Print**. This ensures the text stays perfectly crisp and the colors format correctly for actual ink.
- **For the Website/Social Media:** Download as **PNG**. It keeps the colors bright and sharp for screens.
