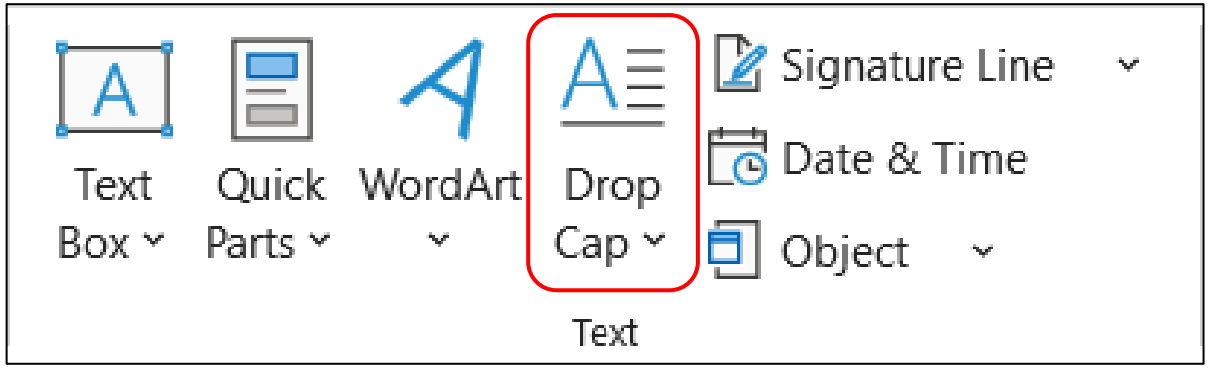
4. *Customize using Drop Cap Options*

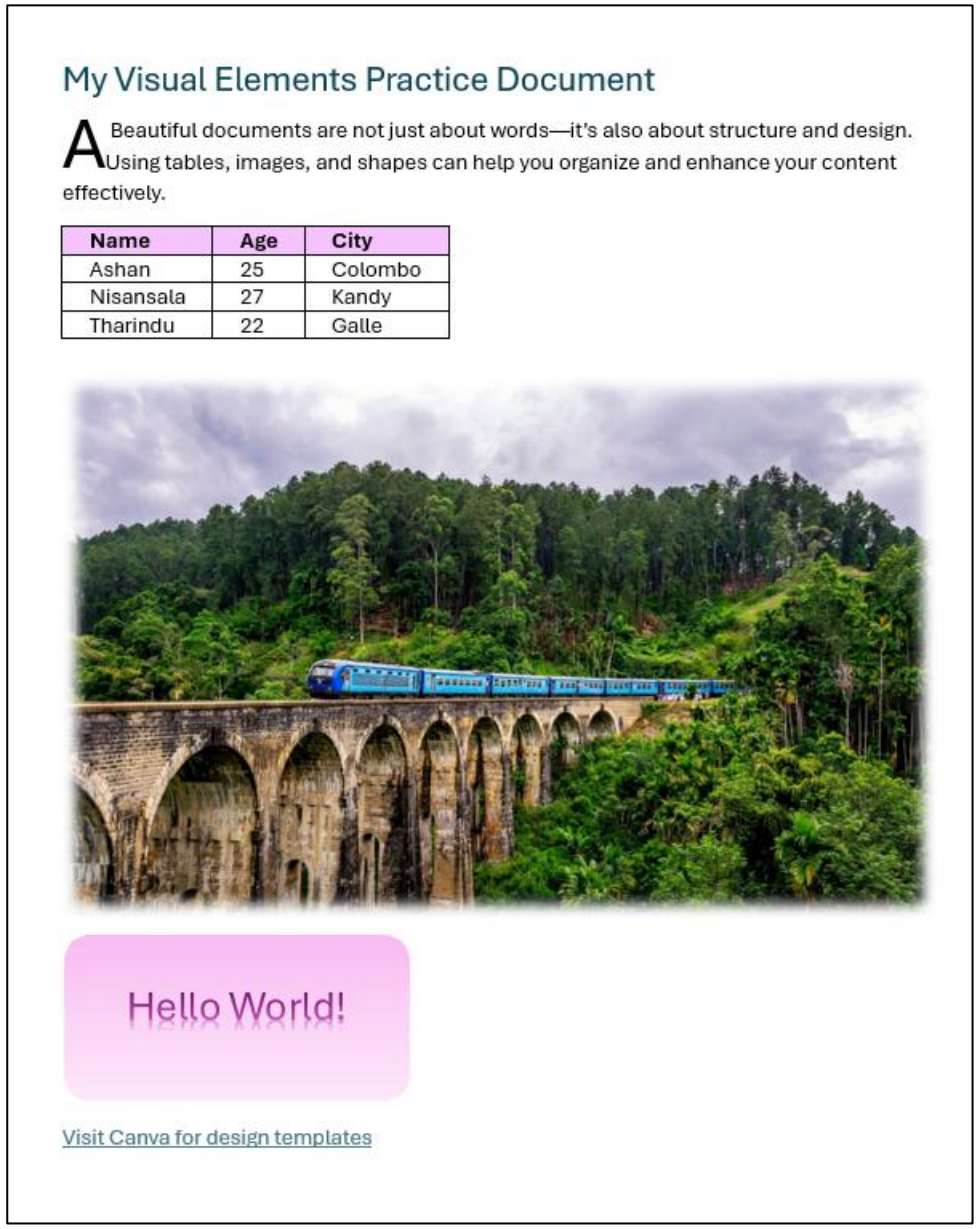
Video provides a powerful way to help you prove your point. When you click Online Video, you can paste in the embed code for the video you want to add. You can also type a keyword to search online for the video that best fits your document. To make your document look professionally produced, Word provides header, footer, cover page, and text box designs that complement each other. For example, you can add a matching cover page, header, and sidebar. Click Insert and then choose the elements you want from the different galleries. Themes and styles also help keep your document coordinated. When you click Design and choose a new Theme, the pictures, charts, and SmartArt graphics change to match your new theme. When you apply styles, your headings change to match the new theme. Save time in Word with new buttons that show up where you need them.



Practice Task

Create a mini document that includes:

1. *A 3x3 table with your sample data*
2. *One image, wrapped with text*
3. *One shape with your name inside*
4. *A Drop Cap in the first paragraph*
5. *A hyperlink to a website of your choice*
6. *Save*



My Visual Elements Practice Document

Beautiful documents are not just about words—it's also about structure and design. Using tables, images, and shapes can help you organize and enhance your content effectively.
