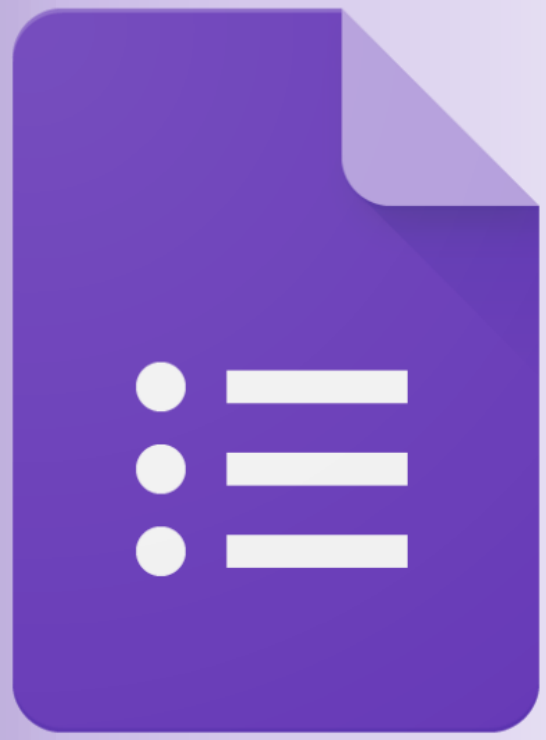
Session 17: Google Forms – Create, Customize & Collect Data



Presented by

Ravindu Sooriyaarachchi

Google Forms

What is Google Forms?

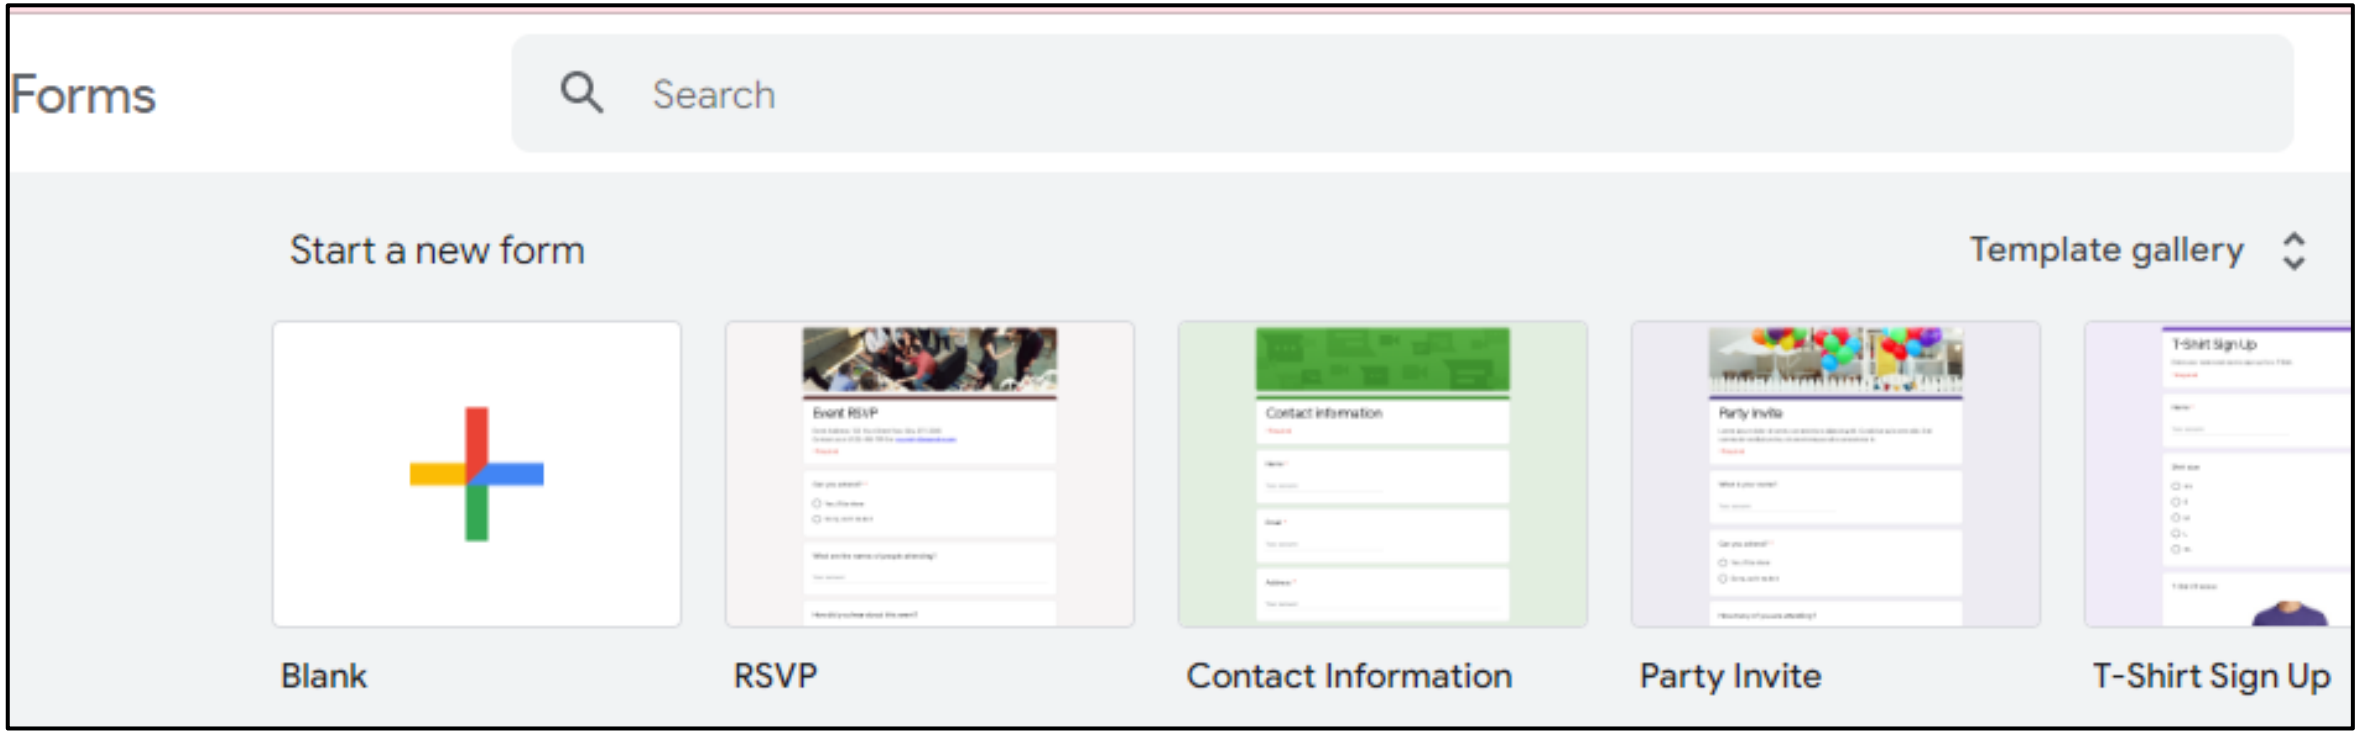
- A free online tool by Google to create surveys, quizzes, and feedback forms
- Automatically collects and organizes responses
- Works on any device with internet access
- Linked with Google Sheets for easy data analysis

Example Uses:

- Event registrations
- Feedback collection
- Quizzes & assessments
- Polls & opinion gathering

Accessing Google Forms

- **Ways to Open Google Forms:**
- Go to forms.google.com
- From Google Drive → **New** → **More** → **Google Forms**
- From Google Docs/Sheets → **Tools** → **Create a Form**
- **Tip:** Use Google account for full functionality & saving progress automatically.

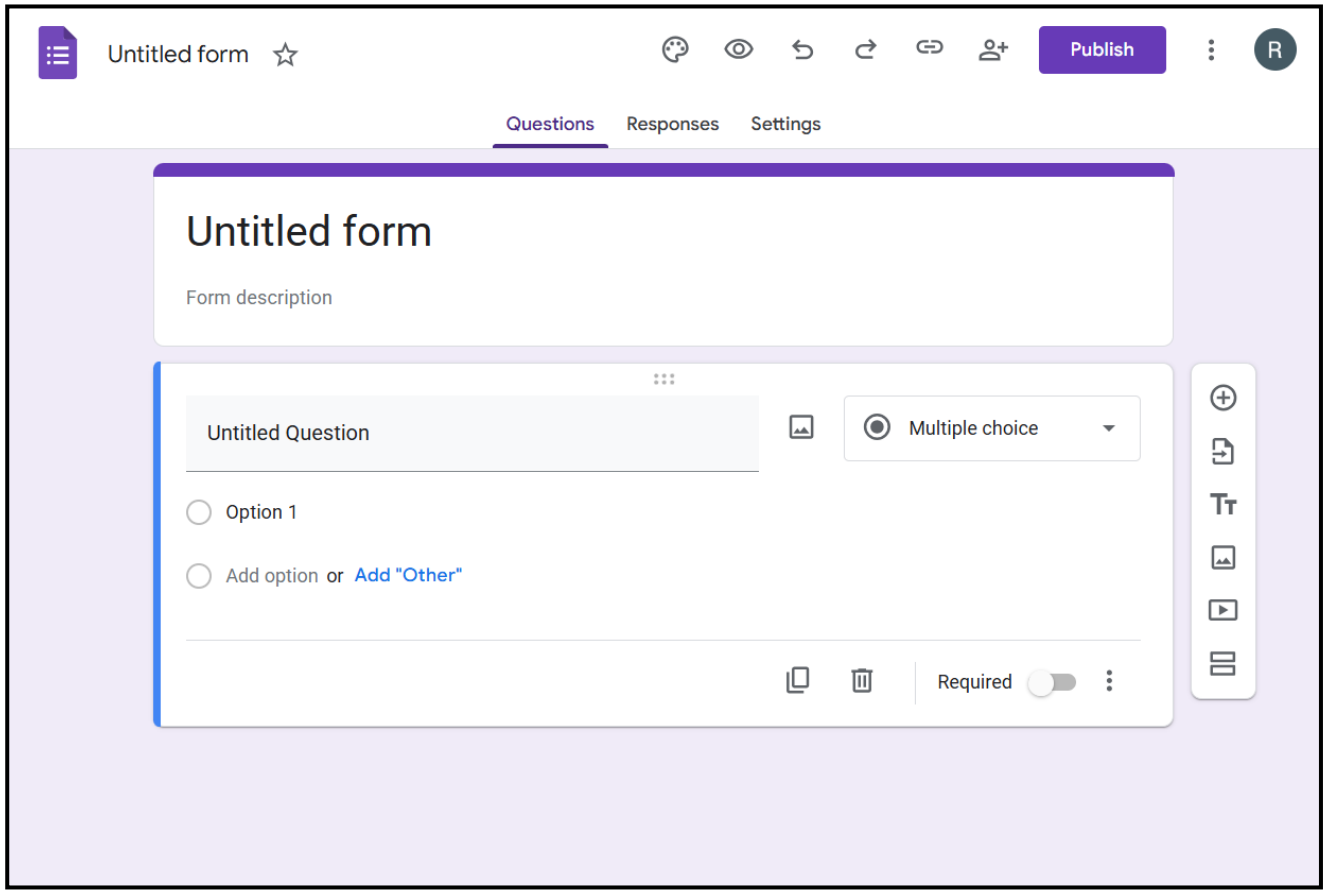


Interface Overview

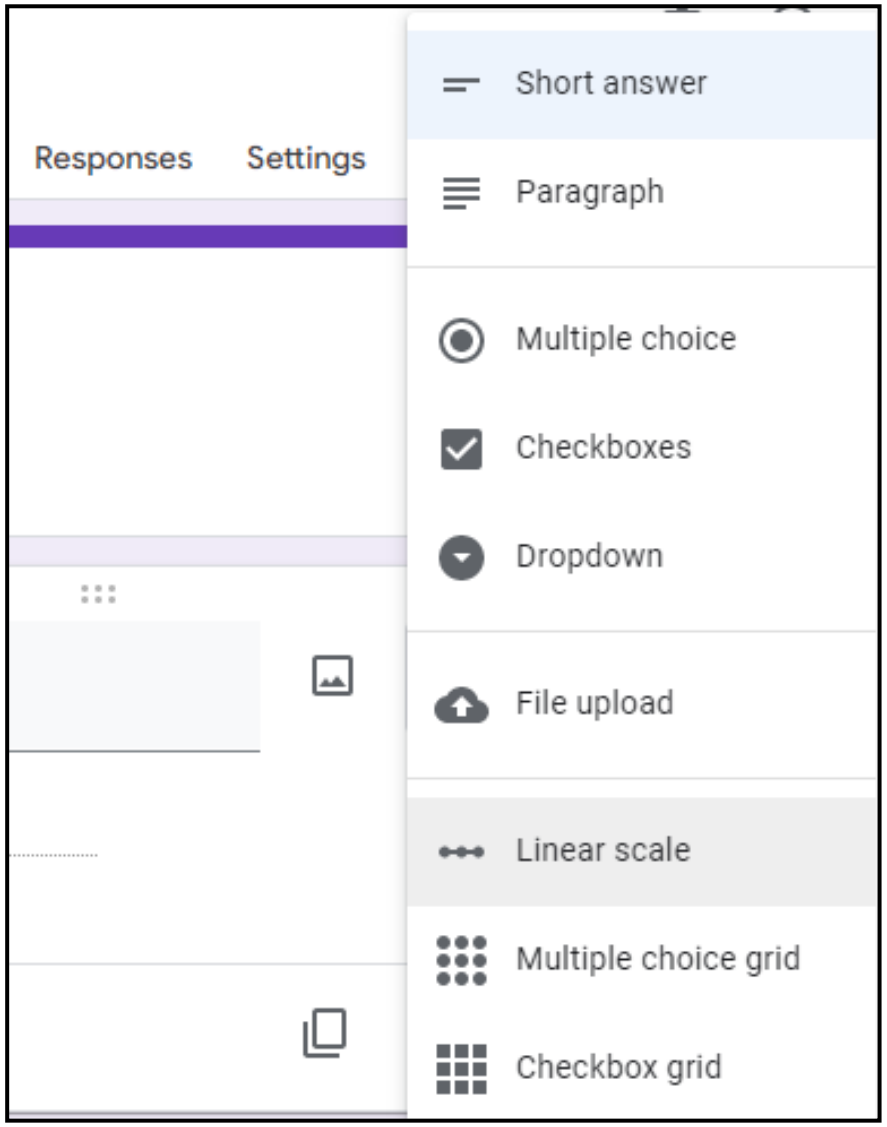
Main Sections:

- **Title & Description** – Name your form and explain its purpose
- **Question Area** – Add, edit, and arrange questions
- **Toolbar** – Insert images, videos, or sections
- **Theme Options** – Customize colors and fonts
- **Settings** – Control how responses are collected & managed

Tip: Explore each icon in the floating toolbar on the right.



Adding Questions



Question Types:

- Short answer / Paragraph – For text responses
- Multiple choice – One option only
- Checkboxes – Multiple selections allowed
- Dropdown – Compact list of choices
- Linear scale – Ratings (e.g., 1–5 stars)
- Date / Time – Collect scheduling info
- File upload – Let respondents attach files

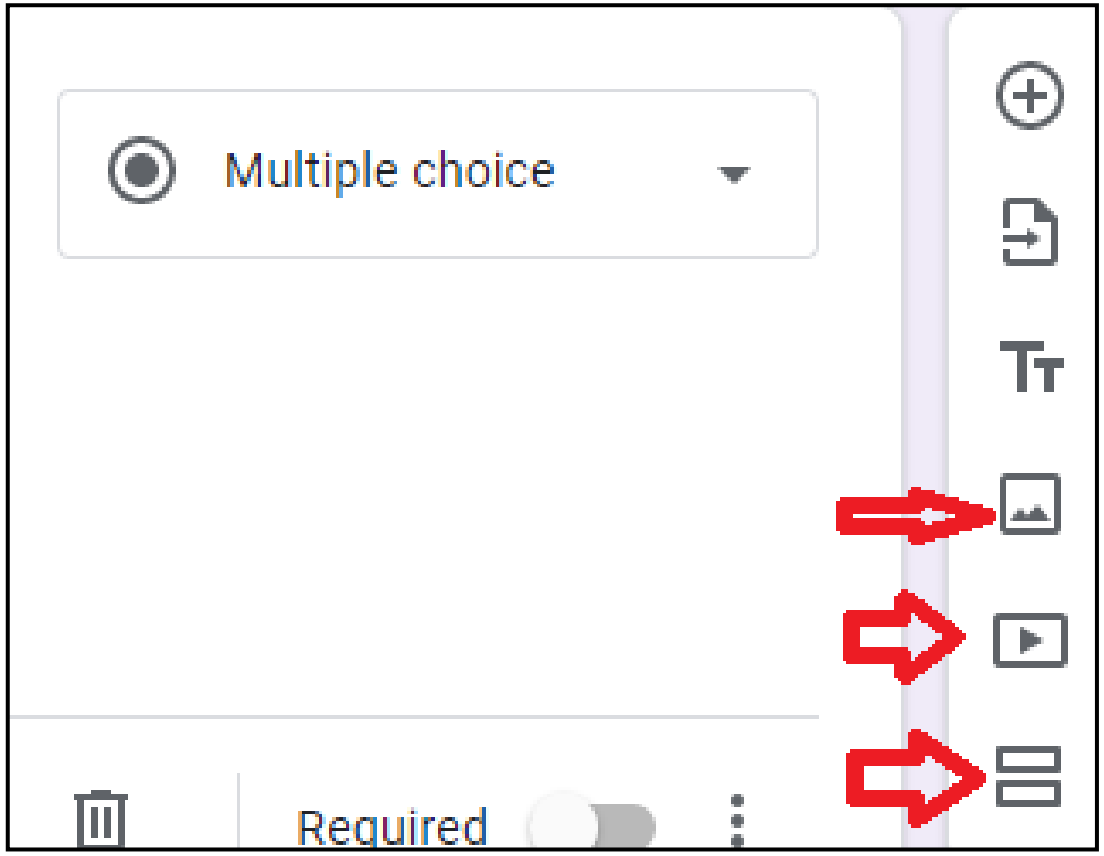
Tip: Use the duplicate button for similar questions to save time.

Adding Media & Sections

- **Add Images:** For visual references or branding
- **Add Videos:** From YouTube or upload from Drive
- **Add Sections:** Split forms into multiple pages for clarity

Why Use Sections?

- Reduce form fatigue
- Group similar questions
- Create conditional logic (jump to a section based on an answer)



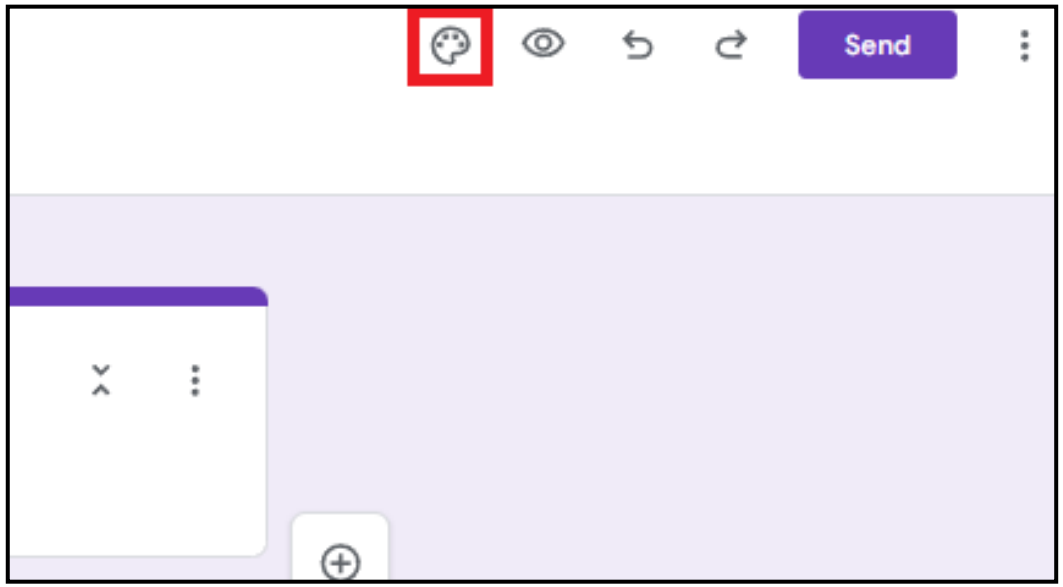
Customizing Your Form

Theme Customization:

- Change header image
- Adjust background color
- Pick a font style

Why Customize?

- Makes the form visually appealing
- Matches your brand or event theme



Advanced Settings

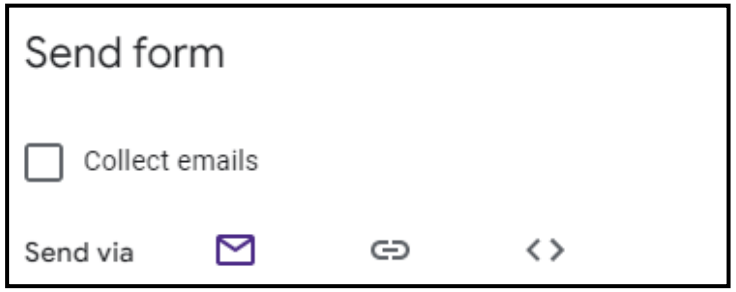
Key Features:

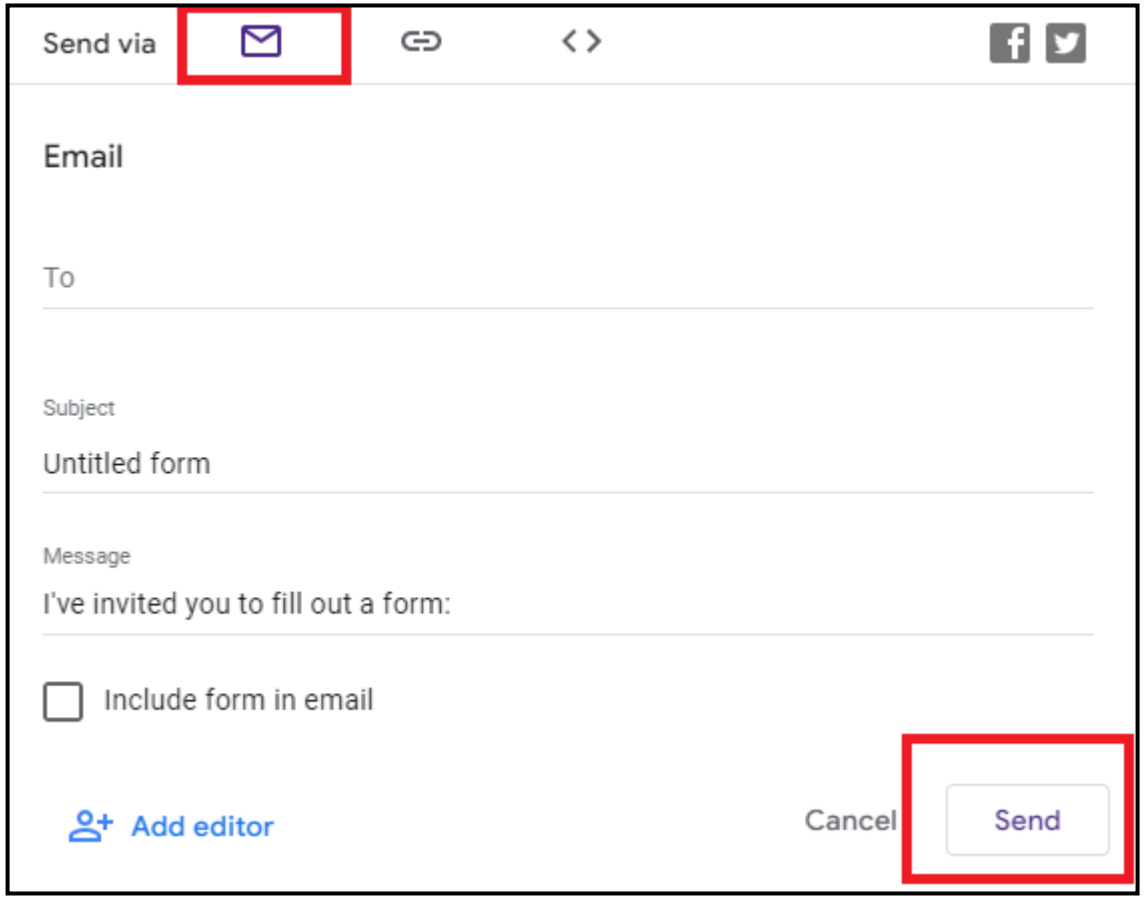
- Collect email addresses
- Limit to one response per person
- Allow editing after submission
- Shuffle question order
- Quiz mode – Auto-grade and assign points
- Response validation – Enforce answer rules

Sharing Your Form

Options:

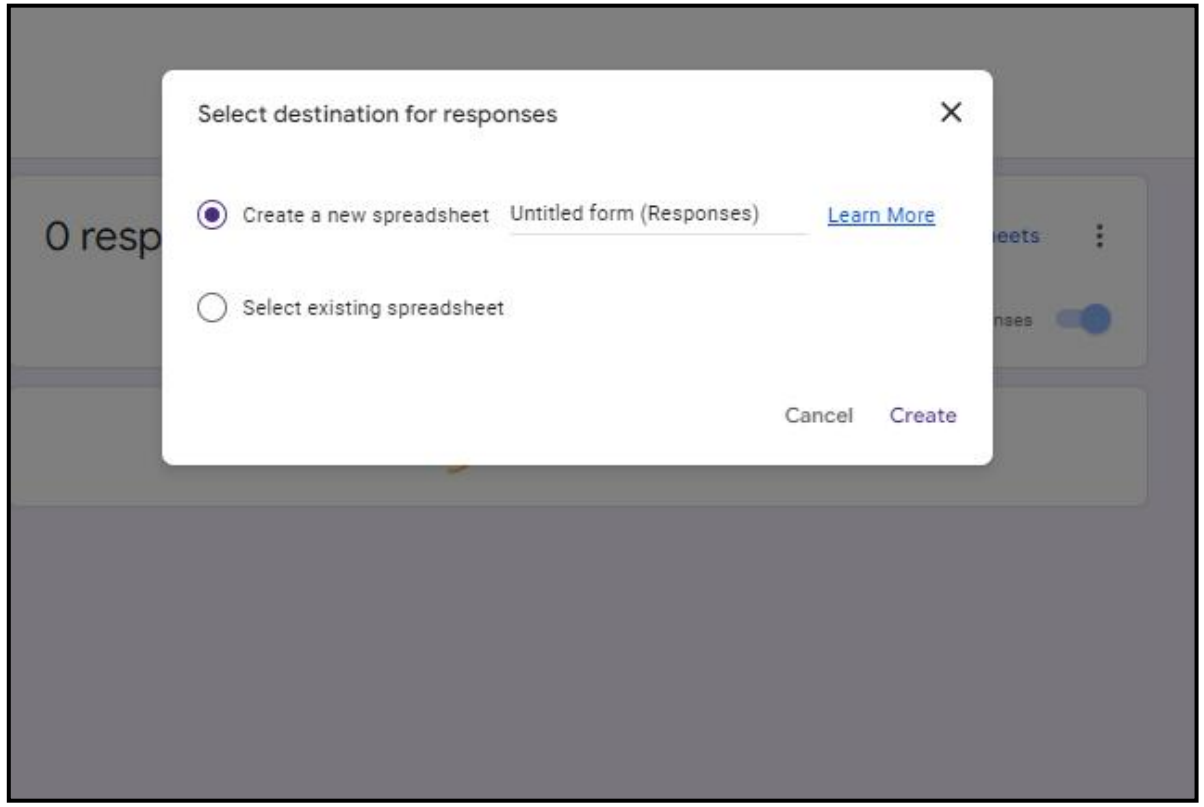
1. **Send via Email** – Directly to recipients
2. **Share Link** – Copy and paste anywhere
3. **Generate QR Code** – Easy for mobile access
4. **Embed in Website** – Insert HTML code into your site
5. **Add Collaborators** – Let others edit your form





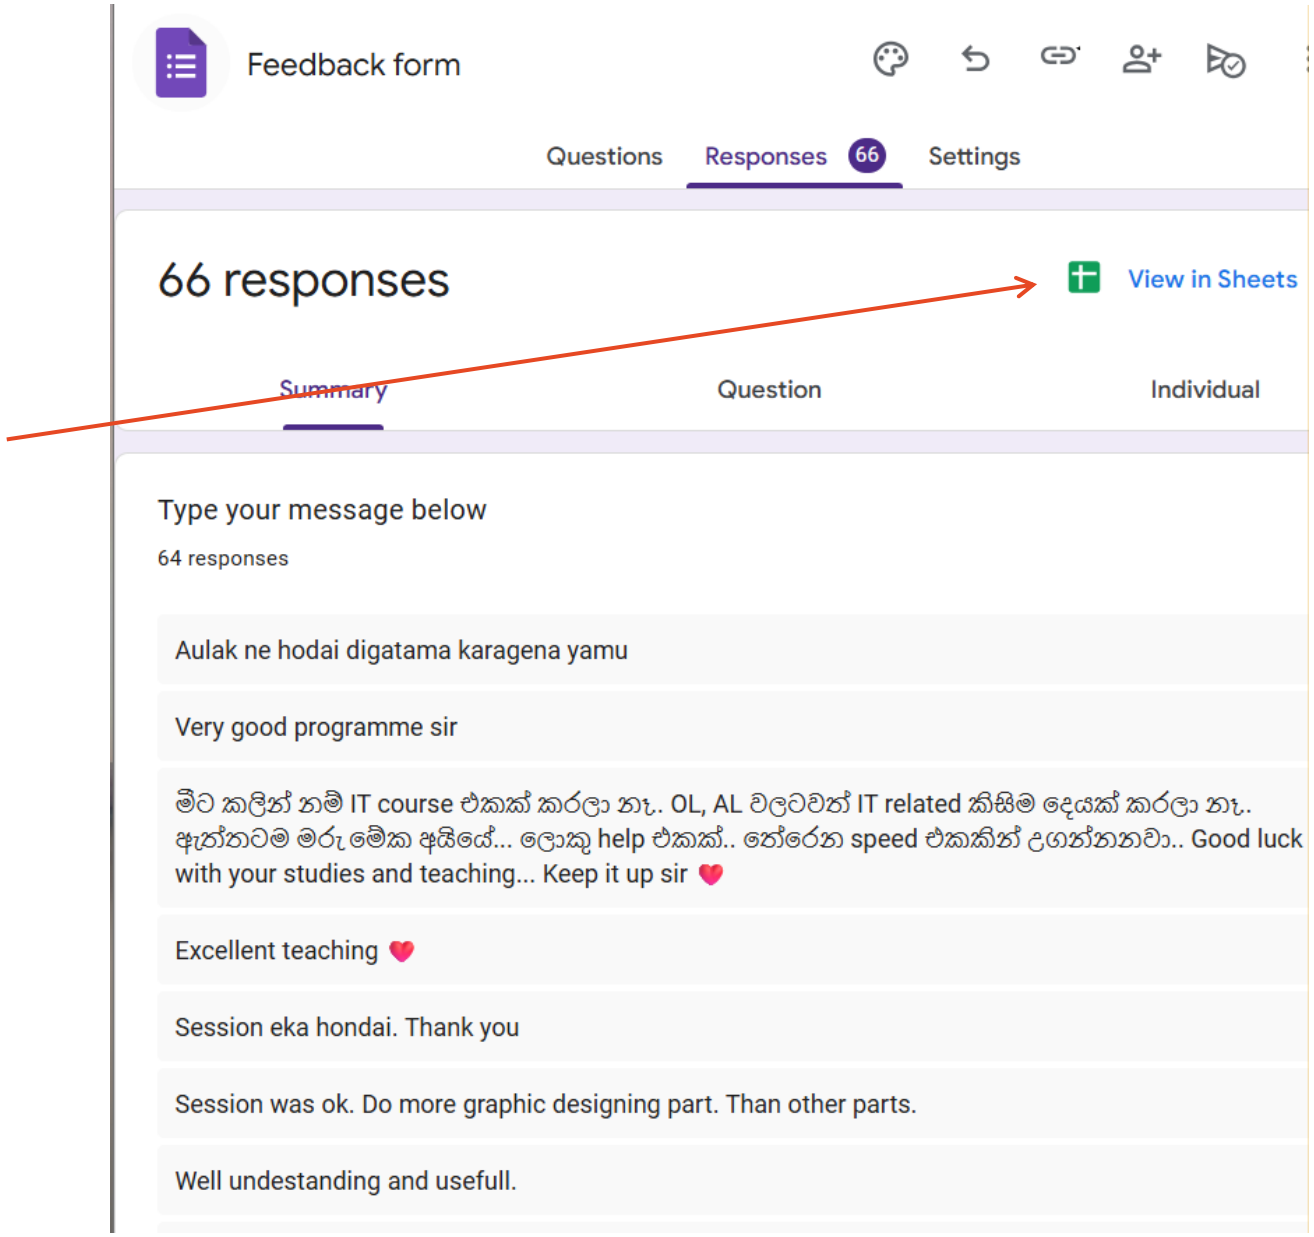
Viewing & Analyzing Responses

- **Summary View:** See graphs and charts automatically generated
- **Individual View:** Check one person's answers
- **Export to Google Sheets:** For deeper analysis or record keeping
- **Download CSV:** For offline analysis



Moving from Collection to Analysis

- Clicking the green "Link to Sheets" icon is the most important step in Google Forms.
- It automatically creates a live spreadsheet.
- Every time someone hits "Submit", a new row instantly appears in the sheet.
- Pro Tip: You can download this Google Sheet as an Excel file (File → Download → Microsoft Excel) to use advanced tools like Pivot Tables!



Why We Use Drop-downs, Not Short Answer

- If you ask, "What is your department?“

as a Short Answer, people will type: "IT", "I.T.", "Info Tech", and "it".

- When you export this to a spreadsheet, Excel thinks those are 4 different departments!
- The Golden Rule of Forms:

Always use Drop-downs or Multiple Choice for data you want to analyze later. Only use Short Answer for names and emails.

Practice Task: The HR Event Challenge

1. Build the Form (The Setup):
    - Employee Name (Short Answer)
    - Department (Drop-down: IT, Sales, Marketing, HR)
    - Meal Preference (Multiple Choice: Chicken, Fish, Vegetarian)
2. Generate Data:

    Share your form link in the chat. Fill out at least 5 forms for your classmates.

3. The Boss Calls (The Analysis):

"The caterer is waiting. How many Vegetarian meals do we need?"

Step 1: Click the green Sheets icon to export.

Step 2: Download as a Microsoft Excel file.

Step 3: Use a Pivot Table or COUNTIF to find the exact number!

Send Me Your Thoughts (Anonymously!)

Scan the QR code and share your questions or feedback
